1 Productivity simulation with promodel for an automotive assembly workstation involving a lift assist device
Qiuli Yu, Vincent Duffy, John McGinley, Zachary Rowland
December 2006 **WSC '06:** Proceedings of the 38th conference on Winter simulation
Publisher: Winter Simulation Conference

Full text.available: 📄 pdf(293.21 KB) Additional Information: full citation, abstract, references

With advances in computer technology and digital human modeling methodology, it is possible to predict risks of potential injuries during manufacturing design prior to production, and make proactive ergonomic design for manufacturing assembly workstations ...

2 Analyzing printed circuit board assembly lines using a PCB assembly template
Pradip D. Jadhav, Jeffrey S. Smith
December 2005 **WSC '05:** Proceedings of the 37th conference on Winter simulation
Publisher: Winter Simulation Conference

Full text available: 📄 pdf(227.03 KB) Additional Information: full citation, abstract, references

PCB assembly lines are characterized by asynchronous transfer of parts resulting from variability in terms of random processing, failure, repair, exhaust, and replenishment times. The throughput for such manufacturing systems depends upon simultaneous ...

3 Digital factory: simulation enhancing the product and production engineering process
Wolfgang Kühn
December 2006 **WSC '06:** Proceedings of the 38th conference on Winter simulation
Publisher: Winter Simulation Conference
